

Smart Food Dispenser Petoneer Nutri

Smart Food Dispenser Petoneer Nutri

Ref: 6930460005212

Petoneer Nutri food dispenser

Feed your dog or cat and ensure healthy eating habits. With a 3.7L capacity, your pet will always get the right portion of food on time. The device can be controlled from the app. Notifications about a small amount of food left will make sure you never forget to replenish your pet's food. A hidden Power Bank slot allows the device to run for long periods of time without being connected to a constant power supply.

Intelligent feeding

A special, dedicated application allows you to program the time of feeding, as well as the number of portions. This way you can easily take care of your pet's healthy eating habits - prevent him from overeating and make sure he doesn't go hungry. Create the right feeding plan for your pet and make sure he's neither overweight nor underweight in just a few clicks!

Full control

From now on you can see your pet's feeding history. Feed him a balanced diet and get a notification from the app when your dog or cat has eaten his portion. And, of course, you can also give your pet food outside of their regular feeding time if you see fit. Worried about

forgetting to refill your pet's food? Don't be! Special notifications sent to your phone will remind you.

Voice control with Alexa

Are you looking for additional possibilities to remotely control your feeder? Petoneer Nutri will be perfect for you. The device is compatible with the Amazon Alexa assistant, so you can control it with voice commands. Now you can feed your pets by saying a simple sentence such as "ask Petoneer to feed my puppy 1 portion of food on Nutri". Life should be simple - your furry pet deserves it too!

Clever design

With two sets of smart sensors built in, the Nutri can efficiently provide you with information on how much food is left and if it's missing. Don't have your smartphone handy to receive a notification of running out of food? No worries! LED indicators also let you know when you need to refill. At the same time, the reservoir is designed to prevent small food particles from getting blocked in it. The reducer and low speed also ensure that the right energy is always available for feeding. The reversal of the rotor rotation is ideal in case of blockages.

Feeding at the touch of a button

Even without a telephone, you can feed your pet comfortably. All you have to do is press a button to use the manual feeding option. Are you afraid that your pet will accidentally press the button and eat an extra portion? Don't be! Use the deactivation option available in the app and worry no more.

Huge capacity and easy cleaning

Once filled, Nutri holds enough food to feed small dogs and cats for days. The large feeder capacity of 3.7L makes this possible. What's more, the detachable container and simple design make it easy to keep the unit clean too. Taking care of your furry family has never been so easy!

Space for a Powerbank

An invisible slot on the back of the unit allows you to insert a powerbank, which can act as a backup battery in case of power failure. No longer limited to regular grid power - the Petoneer Nutri gives you the freedom of choice and the guarantee of reliable operation even if there is a power outage.

Compatible with TUYA

The Petoneer Nutri food dispenser runs on the TUYA platform. This means that it is compatible with other products that use TuyaSmart. To provide you with the best user experience, the Petoneer app is built on the Tuya protocol. This makes it extremely intuitive, easy to use and yet functional, providing you with a range of additional capabilities.
