Smart pot aspara by GrowGreen Stylist Lite Smart Grower.

Don't have a hand with flowers, but love lush vegetation? Or maybe you dream of growing your own vegetables? With the Aspara smart pot you can easily create a green home! In the pot you will find as many as 8 places for planting. With adjustable LED lights and special planting programs, you can enjoy planting a variety of products under your own roof and enjoy your harvest. A dedicated app will allow you to monitor the growing process and also make it easier to manage the pot.

It will take care of your crops by itself

The pot uses advanced technologies that will provide your plants with everything they need. You can choose from a variety of planting programs for each plant species, so the pot will automatically adjust the light intensity or take care of their hydration. Dedicated programs will also help you increase plant growth by up to 50%! What's more, it is equipped with sensors that detect light intensity, water level, air and water temperature, as well as nutrient concentration.

LED light that stimulates growth

Your plants no longer need natural light! The smart pot is equipped with special LED lamps that provide illumination at 400 μmol . The lamps stimulate plant growth at different stages of development by automatically adjusting the intensity of lighting. So you can be sure that your plants will receive the ideal amount of light.

More possibilities with the app

Combine the smart pot with a dedicated app to gain access to other features! You can find the app in both the Google Play store and the App Store. It will allow you to monitor the growing process and adjust the pot settings to your preferences. You also don't have to worry about forgetting to refill the water in the pot - the app will remind you! You will also get practical tips and advice on planting.

It will work for different plants

Grow a variety of plants and enjoy a bountiful harvest. The Aspara pot will work great for many types of plants. Among other things, you will use it for planting aromatic herbs, tasty vegetables and fruits or fragrant flowers. You can plant up to 8 plants in the pot. In addition, you can easily adjust the size of the pot with the help of side panels. Thanks to this solution you can freely plant taller plants as well.

A practical addition to any interior

The Aspara smart pot is distinguished by its modern and stylish design, so it will fit perfectly into almost any interior. You can also use more pots and create a unique green wall of plants. The device weighs only 2.6 kg, so you can easily move it wherever you want.

Simple and convenient operation

Experience how easy it is to grow plants, herbs and vegetables in your home. Assembling the pot will not cause you any problem - it is exceptionally simple and will take you only a few moments! Planting the plants themselves will not be a challenge for you. To begin with, pour water into a 2-liter container. Put the seeds in biodegradable inserts, then put them in the appropriate places in the pot and cover them with a special lid. Finally, choose the appropriate program and wait for your crop!
