

LDNIO Car Mount ,MW21, with inductive charger 15W (Black)

LDNIO Car Mount ,MW21, with inductive charger 15W (Black)

Ref: 6933138600160

Car holder with inductive charger LDNIO MW21

Enjoy navigation freely and renew your smartphone's power quickly. The LDNIO MW21 car mount is adjustable 360°, so you can always have your phone within reach! What's more, the product is equipped with a 15W Qi inductive charger, a USB-C port and features automated operation. You can easily mount it on the air vents of your car.

A practical gadget for every driver

Ensure that your smartphone is always ready to go. The MW21 holder is equipped with an inductive charger that enables 15W Qi fast charging. All you have to do is place your phone in the accessory and the latches will automatically tighten, ensuring the stability of your device.

Fast charging

If you're a user of a Huawei, Apple, Xiaomi or Samsung smartphone - you'll be happy to know that the LDNIO inductive charger allows fast charging of the mentioned devices with up to 15 watts of power. The product supports PD and QC3.0 protocols, plus a smart chip makes the MW21 automatically adjust the power to your device.
