

Smart Lock with keypad Lockin SMART LOCK G30

Smart Lock with keypad Lockin SMART LOCK G30

Lockin SMART LOCK G30 with keypad

The Lockin G30 is a smart lock with keypad that will allow you to open your front door no matter where you are - you can do it from within the app, using a PIN or fingerprint. The device also supports voice control via Google Assistant or Amazon Alexa. You can also grant access to the lock to other household members. Installing the G30 will only take a moment, and you don't have to worry about saved passwords - with Lockin your data is safe.

Open doors remotely

You no longer need to look for keys to open the door to your home. The Lockin smart lock allows you to do it remotely no matter where you are. Using a dedicated app, you can also check if the door is currently open/closed or who has just entered the house. For the function to work properly, you need a Wi-Fi hub (included).

Grant access to others

Take full control of Lockin G30 and conveniently manage access authorization. The smart lock with keypad remembers up to 50 PIN codes and up to 20 fingerprints, so it will benefit multiple people. From the app, you can grant access to selected people and monitor when they use the lock. In addition, it is possible to assign passwords to others on a permanent, temporary, or one-time basis. Thus, it

will be perfect for rental houses - you no longer need to give your guests the keys, just send a timely access code for the duration of their stay.

Various possibilities

You can open the door in several ways, so everyone will choose the most convenient one for themselves. In addition to the app, the lock also supports Amazon Alexa and Google Assistant voice assistants. You can also open the door with a preset PIN or fingerprint. In addition, the Auto Lock function allows you to lock the door automatically, so you don't have to worry about forgetting to do so. You can also temporarily disable the lock when you leave the house just for a moment to take out the trash, for example.

Robust design, easy installation

The keypad is distinguished by its wireless and reliable operation. It is also water-resistant to IPX5 level - it is not intimidated by raindrops. A number of convenient buttons allow you to easily open or close the door. You can also do it from a dedicated fingerprint panel. In addition, an LED indicator will let you know the status of the product's operation. On the other hand, installation of the device will take about 10–15 minutes. You don't need additional tools or replacement of the original lock for this purpose.

Please note

Before purchasing, please check whether the lock fits your specific door type. The following conditions should be met for the product to be installed:

Europrofil, lock to be keyed from the inside, distance from door to cylinder lock more than 3mm, key cylinder openable from the outside when keyed in, key thickness less than 7 mm, distance from key to cylinder lock less than 40mm. In other cases, the installation of a Lockin lock may require the replacement of the door cylinder.

Included
