

## Electric Scooter Navee S65

Electric Scooter Navee S65

Ref: 6975293670206

### Navee S65 electric scooter

Now you can get around the city quickly and comfortably. The Navee S65 electric scooter is distinguished by a range of up to 65km and allows you to go at speeds of up to 20km/h. It is equipped with a 500W motor and a dual suspension system. Its additional advantages are IPX5 water resistance and 10-inch tubeless, self-sealing tires. The scooter is also compatible with the Mi Home app, with which you can, for example, set cruise control, adjust settings and use the vehicle's self-driving function.

### Improved suspension system

Forget about unpleasant shocks and enjoy your ride even more. The S65 scooter offers an improved suspension system (front and rear), making it perfect for almost any conditions. With Navee you won't be intimidated by uneven sidewalks, cobblestones or low curbs - the S65 model will be perfect for getting around town and beyond!

### 10-inch wheels

What else makes the S65 scooter perform so well even in difficult conditions? The vehicle is equipped with large 10-inch wheels with tubeless, self-sealing tires. As a result, you don't have to worry about air leakage or similar problems. With the Navee you simply enjoy the ride! What's more, the scooter's tires are excellent at absorbing shocks, which translates into a more comfortable experience.

### Range of up to 65 km

Say goodbye to the need to charge your scooter frequently. The S65 has a high-capacity, long-lasting lithium battery built in, allowing it to provide a range of up to 65km. Daily commute to school or work? Or maybe a short trip out of town? Don't worry that the scooter will discharge too quickly and derail your plans! Safe and efficient operation of the battery is guaranteed by a special BMS system.

### Even more joy of riding

Enjoy a smooth and pleasant ride. Thanks to the 500W brushless motor, the scooter provides better acceleration and easily overcomes inclines of up to 25%. What's more, the vehicle will not get excessively hot. Also noteworthy is the large deck with a width of 17cm and the pleasant-to-touch handlebar grips made of high-quality TPE plastic. However, this is not the end of the amenities - the scooter was created from durable aircraft aluminum, which means that it can easily withstand a load of up to 120kg.

### 3 modes to choose from

Adjust the speed of the scooter to your expectations or to the situation. The Navee S65 lets you choose from 3 riding modes. Walk is perfect, for example, on a crowded sidewalk - it provides a speed of up to 5km/h. Standard offers a maximum of 15km/h. Do you dream of slightly higher speeds? Choose Sports mode, which guarantees a speed of up to 20km/h. To change the mode, just press the appropriate button - you can do it at any time while driving.

### Even more conveniences

Enjoy convenient access to information about the scooter's operation. The S65 has a built-in small LED screen, with which you can quickly check the speed, the selected mode, the remaining battery level and more. Now you have all the most important data at your fingertips! However, this is not the end of the scooter's advantages - the vehicle is distinguished by IPX5 water resistance, which means that it will perform perfectly in almost any conditions. Did you get caught in the rain during your trip? You don't have to be afraid of anything!

### For the sake of safety

Take care of your safety on the road. The scooter is equipped with a large disc brake so you can stop quickly. The vehicle also offers a 2.5W front light that will increase your visibility and make it easier to ride after dark. Even if your trip drags a bit and it gets dark, you'll get home safely with the S65!

### Simple folding in 3 steps

Don't be afraid of problems with transporting and storing your scooter. Navee S65 features a folding design - you will fold it in just 3 easy steps. After folding, the vehicle becomes small enough that you can easily find a place for it in the trunk, in the hallway or in the office. Moving the scooter from place to place won't be a problem either!
