TIKTAALIK MIC+ Wireless Microphone (black)

Mic+ is a wireless microphone with lots of useful features. Vlog, live broadcast, music recording, interview, video chat - this compact device will work well in these and similar situations. It works with Android and iOS operating systems, and connects to a compatible device via Bluetooth. In addition, the microphone is equipped with a special clip that will allow you to attach the Mic+ to clothing, such as a blouse.

Various applications

The microphone is an essential tool for vloggers, YouTube content creators, journalists, artists, etc. You will also use it for presentations, online lectures, recording music, instructional videos, etc. Tiktaalik Mic+ works with platforms such as Zoom, Twitch, YouTube, Vimeo, Facebook live and Google Meet.

Captures voice perfectly

The Tiktaalik Mic+ microphone enables Hi-Fi 48 bps 16-bit audio recording, which translates into accurate voice recording. In addition, the 8mm condenser microphone module helps reduce ambient noise, such as wind noise. The wide frequency range provides balanced and richly detailed sound, so you can successfully record ASMR or a new song.

More possibilities

Are you recording an interview or perhaps conducting a live broadcast? If so, you will find it useful to have 2 microphones. All you have to do is connect them to your smartphone and activate the recording function in the dedicated app. Enjoy even more convenience with the Tiktaalik Mic+.

Transmitter and receiver mode

The Tiktaalik Mic+ microphone offers 2 modes of operation TX and RX. The first one acts as a transmitter, allowing you to turn wired devices into wireless ones. This means that when you connect the microphone to your TV via cable, you can pair TWS headphones with it, for example. Receiver (RX) mode, on the other hand, will work well for devices that are not equipped with Bluetooth. These will be, for example, speakers or cars. For this you will need a 3.5mm audio cable (included).

Lightweight and compact

The Tiktaalik Mic+ wireless microphone will work well both indoors and outdoors. It is lightweight (18 g) and compact - its length is only 7 cm. You won't even feel that you are wearing it. In addition, a special clip will allow you to clip the microphone to your blouse or other part of your clothing. You can also put it on a table or hold it in your hand.

Up to 10 h on a single charge

Enjoy a long microphone runtime. The Tiktaalik Mic+ is equipped with a 300 mAh lithium battery, which allows for about 10 h of continuous recording. What's more, you'll charge it to 80% in about 30 min. The task will be facilitated by the included USB-C cable. The microphone is also equipped with a color indicator that informs you about the selected mode and low battery level.

Record outdoors

The Tiktaalik Mic+ allows you to record almost without limits. It uses Bluetooth version 5.0 and is distinguished by a range of up to 20 meters, which will allow you to create footage from slightly longer distances as well. What's more, it effectively eliminates ambient noise, so viewers can focus on the content you're conveying.

Wide compatibility

Worried that the microphone won't work with your equipment? Don't be! Tiktaalik Mic+ is compatible with devices such as a camcorder, laptop, smartphone, sports camera, TV, speakers, etc. You'll also connect it to a screen on an airplane or treadmill.

Dedicated app

Gain access to practical functions with a dedicated app. It supports shooting in 4K, applying filters or adjusting frame - 30/60 frames and image brightness. It also allows you to enable/disable noise reduction. In addition, it works with Android and iOS operating systems.

Included

- microphone
- 3.5mm audio cable
- USB cable
- RCA cable
- wired headphones
- ear hooks (S/M/L)
- wind shield
- user manual
