Nextool flashlight NE0126 2000lm

Looking for a reliable flashlight that will be helpful not only in the field, but also during nighttime emergency car repairs or nighttime reading in bed? The Nextool flashlight will be perfect for you. The brightness of its light can reach up to 2000 lm. Moreover, you will be able to illuminate up to 380 meters in front of you with it. It has also been equipped with 4 different light modes for your comfort, and it can operate for up to 140 hours.

4 light modes

The Nextool flashlight has up to 4 different light modes to make you even more comfortable. If you're a night person and often go out for night walks or want to stop your car after dark, use the Highest mode, which will allow you to illuminate the area with 2,000 lm of power. When camping or going on a camping trip, use the High mode (560 lm), and if your car breaks down after dark and you need to repair it, use the Medium mode (200 lm) to see all parts of the engine perfectly. On the other hand, when reading or doing housework at night, use the Low mode, which gives a light output of 25 lm.

Comfort of use

The NE0126 flashlight is not only a functional device, but also very comfortable. It will be comfortable to use, because it is not only lightweight (its weight reaches 265 g), but also has a comfortable handle that will lie perfectly in your hand. You don't have to worry

about a drained battery, as you'll charge it conveniently with the USB-C cable included. In addition, its operating range is up to 380 meters, and you can conveniently switch light modes with a single button. You no longer need to fear the dark!

Battery

The Nextool device is equipped with a powerful 5000 mAh battery. Its state will show you a special 4-level sensor. Depending on the selected mode, its working time is up to 140 hours, so darkness will never be an obstacle for you again. When the battery is depleted, it will quickly regain its full energy, as its charging time is only 3-5 hours, and you will do it conveniently using the USB-C cable included in the package.

Guaranteed protection

The Nextool flashlight is safe to use. You can take it on any trip, as it exhibits IPX7 water resistance and drop resistance up to 1m. Moreover, it is made of high-quality materials, which guarantees its durability. In addition, the anti-rolling design will ensure that the flashlight will not move by itself from the place where you put it.
