

Joyroom JR-ZS284 car dashboard holder (black)

Ref: 6941237189905

Joyroom JR-ZS284 car dashboard holder (black)

Joyroom JR-ZS284 car dashboard mount (black)

Are you looking for a universal phone holder for your car? Joyroom JR-ZS284 is a small product that stands out for its wide compatibility and will certainly not disappoint you! Easy installation, sturdy construction and a suction cup capable of lifting up to 10 kg! All this means that the Joyroom car mount will provide the required stability for your phone in any conditions!

Childishly easy installation

Just use the special lever at the top of the suction cup to mount the holder anywhere - on the dashboard or windshield of the car. The suction cup ensures that the product stays in place for as long as you need it. The holder is able to bear a weight of up to 10 kg and is not afraid of any shocks! If you want to detach it from its mounting location, just release the lever - the nano tape does not leave any traces behind!

Wide compatibility

The product allows you to mount any phone that fits between 4.5-6.7 inches. You can expand the adjustable arms within this range, and you can lock the required spacing using a special button. Such a solution will allow you to stably grip your phone and ensure its complete safety, regardless of the conditions on the road.

Any phone positioning

This is not the end of the advantages! Joyroom JR-ZS284 allows you to position your smartphone in any position. You can rotate the holder 360°, so you can easily position your phone from a vertical or horizontal position. You can do this conveniently with one hand movement. Use the navigation as you like!
