

Joyroom JR-ZS290 magnetic dashboard car holder with inductive charging

Ref: 6941237196231

Joyroom JR-ZS290 magnetic dashboard car holder with inductive charger (black)

Joyroom JR-ZS290 magnetic car cockpit mount with induction charger (black)

Are you looking for a car mount? What would you say if this holder charged your phone? Joyroom is a wireless charger and magnetic holder in one! It provides a power supply of 15 watts, and the extremely strong magnets will keep your device in place in almost any conditions. The product uses a suction cup that allows you to mount it anywhere on the cockpit, and the rotating head allows you to position your phone according to your preferences. What's more, the LED ring adds an interesting touch to the product.

Wireless charging

You don't have to give up navigation when your phone is running low. Just place it in the holder to start wireless charging! The JR-ZS290 supports the Mag Safe function for instant charging with 15 watts of power! The copper coils responsible for charging have been thickened, which has managed to significantly increase the efficiency of the JR-ZS290!

Extraordinary magnet power

The product is equipped with dual neodymium magnets, so your phone will stay in place under any conditions! The magnets are extremely precise, and their arrangement allows you to attract your device evenly and keep it in any circumstances! Potholes, deceleration thresholds, sudden braking? JR-ZS290 will do a great job!

Customize to your preference

For your convenience, the holder is placed on a special movable head that allows 360° rotation. Such a solution will allow you not only to position your phone vertically, but also horizontally. What's more, you can always tilt the phone in any direction and change its angle when, for example, the sun reflects on it. Nothing limits you!

Easy installation

The JR-ZS290 mount uses a sturdy suction cup that is capable of holding up to 1.2 kg. The suction cup allows you to mount it anywhere on the cockpit, and thanks to the nano tape, you can reposition the mount at will without worrying about unsightly marks. Once mounted, the holder will stay in place for as long as you need it!

Robust construction

The product is made of high-quality materials, so it is sure to serve you for a long time. An enlarged charging field, a metal base responsible for efficient heat dissipation, and a smart chip that offers a range of electrical safety features. Your phone is fully safe with Joyroom!
