

Joyroom JR-ZS295 magnetic dashboard car holder with inductive

Ref: 6941237197153

Joyroom JR-ZS295 magnetic dashboard car holder with inductive charger (black)

Joyroom JR-ZS295 magnetic car cockpit mount with inductive charger (black)

If you're a driver, you certainly use navigation in your car. Make sure it's convenient for you! The magnetic car mount from Joyroom will not only keep your phone steady in one place, but also charge it when needed. The device works with the iPhone 12-14 series and allows instant charging with the Mag Safe feature. The specially designed suction cup allows you to place the holder stably on the cockpit, and thanks to the extremely strong magnets and two side arms, your device will be safe in any conditions! The product allows any 360° rotation, so you can easily adjust the positioning of your phone to your preference.

Mag Safe - holder with charging function

Need navigation, but your phone has leftover power? No worries! Joyroom JR-ZS295 is not only a holder, but also an extremely powerful charger. It provides instant power replenishment for Apple's 14-12 series devices, using powerful N52 neodymium magnets with 15W charging power! It only takes 30 minutes for the iPhone 13 Pro to reach 50%!

Double protection for your device

Now you can get over the biggest bumps without worrying about your phone falling! The special design allows you to keep it in one place in any conditions! The neodymium magnet attracts the phone with tremendous force, and additional automatic buckles grip it from both

sides to ensure total security and the required stability regardless of the circumstances! What's more, the buckles are finished with a layer of silicone, so you don't have to worry about your phone getting scratched or damaged.

Hassle-free installation

Mounting the holder is fabulously easy! The JR-ZS295 uses a solid suction cup, whose nanostructure allows it to be placed anywhere on the cockpit without leaving unsightly marks. What's more, the mount is able to bear a load of up to 10 kg, so you can be sure that once mounted your equipment will stay in place for as long as necessary!

Set up the way you like

The magnetic base has been placed on the head, which allows 360° rotation. This makes it easy to change the positioning of your phone to the one that suits you best. A horizontal position? Or perhaps a vertical one? The choice is up to you. In addition, the movable arm allows you to position your phone at different heights, so it won't obstruct your view. Check out how convenient it is!
