

Joyroom JR-ZS314 gravity dashboard car holder (grey)

Ref: 6956116729790

Joyroom JR-ZS314 gravity dashboard car holder (grey)

Joyroom JR-ZS314 (gray) gravity car cockpit mount

These days, a car mount for your phone is a must! By choosing Joyroom JR-ZS314 you are betting on reliable solutions! The product is distinguished by its small size and incredibly strong magnet. What's more, the mounting base is flexible, so you can easily place it anywhere on the cockpit, and thanks to its 360° rotation, you can position your phone as you are comfortable.

First - a solid base

The specially designed base allows you to conveniently install the holder anywhere. It is flexible, so it perfectly adapts to curved surfaces, providing the required stability. What's more, the use of extremely strong 3M nano tape allows you to mount the holder repeatedly without leaving marks on the cockpit.

Second - the incredible power of the magnet

You can be sure that your phone will stay in place! The JR-ZS314 mount is equipped with 6 neodymium magnets, whose power can withstand a load of up to 3 kg! Just put your smartphone on the holder and it will attract it with great power. Forget about the problems with a sliding device that you have to correct while driving!

Third - convenient positioning

Now you can position your phone as you are comfortable. The movable head allows you to move 360°, so you can adjust the mount to your preference. You can mount your smartphone vertically and horizontally, or tilt it back and forth when the sun is reflected in the screen, for example. What's more, the mount is distinguished by its small size, so it won't get in your way while you're driving, even when you position it in the center of the cockpit.

Fourth and fifth - solid construction and wide compatibility

The product is made of high-quality materials, so you can enjoy its durability for a long time! The mount will perform well in extreme conditions - it can withstand temperatures of -33°C - 70°C. What's more, you can use it with many devices, even those without the Mag Safe function - it comes with special plates that you can mount directly on your phone or case and enjoy the reliable performance of the JR-ZS314!
