

Bike Pump Rockbros JG-PB-11 (black)

Bike Pump Rockbros JG-PB-11 (black)

Ref: 5905316146082

Rockbros bicycle pump JG-PB-11

Stock up with a reliable bicycle pump that you can carry with you at all times. The JG-PB-11 from Rockbros provides up to 130psi of pressure and is extremely lightweight, using a durable aluminium alloy. The product fits AV and FV valves and, thanks to the included needle, also allows you to pump balls. You will also find a bracket in the package with which you can attach the pump to your bike.

Suitable for almost any situation

The inflator allows you to quickly and conveniently inflate a bicycle tyre. It can handle pressures of up to 130psi and is compatible with both AV and FV valves. This makes it perfect for most situations. What's more, the set includes a special needle that allows you to pump up volleyballs, basketballs and more without any problems.

Lightweight, handy, durable

The inflator is made from high-quality aluminium alloy, making it very strong and wear-resistant, yet lightweight - weighing around 67g. What's more, its length when folded is only about 14cm. All this makes the accessory convenient to use and easy to transport. It fits easily into a bike bag or backpack, for example, or you can attach it to the frame with the included handle.
