Bicycle Light Rockbros YQ-QD400LM (black)

Ref: 5905316145382

Rockbros bike light YQ-QD400LM

Ensure your safety when cycling and increase your visibility on the road. The Rockbros YQ-QD400LM bike light stands out with a brightness of 400lm and offers 3 light modes to choose from. It is equipped with a 2000mAh rechargeable battery, so it can provide a long runtime. It is also very easy to install and waterproof to IPX3 level.

The perfect light source

Get ready for your next ride after dark. The light provides a brightness of up to 400lm and generates a diffused light with a long reach. It will therefore illuminate your way fantastically and increase your visibility! The device also allows you to choose from 3 light modes. In low mode the brightness is 200lm and in strong mode it is 400lm. A flashing mode is also available.

Simple assembly

The Rockbros light is very easy to mount - you don't need any tools. It is equipped with a rubber strap, with which you can easily attach it to the handlebars. What's more, the non-slip base gives the unit the necessary stability - don't worry about it moving or rotating. The light is also very light and handy, weighing only around 122g.

Waterproof and robust

The housing of the light is made of high-quality aluminium. This means that the device is very robust and resistant to damage. Even if it falls to the ground, nothing should happen to it! The product also features IPX3 water resistance. This means that it is unafraid of a gentle splash or light rain. If the weather suddenly turns bad during your excursion, you will get home safely with Rockbros!

Powerful battery

Your excursion has dragged on a bit and dusk has fallen? Don't worry that the light will fail you too quickly! The device is equipped with a powerful 2000mAh battery, so it works for about 2-3 hours in strong mode and about 5-6 hours in low and flashing mode. The product is rechargeable via USB, so you can renew its energy with a charger, powerbank or even your laptop.
