

## Summer cycling face mask Rockbros LF7357 (Black)

Ref: 5905316145634

Summer cycling face mask Rockbros LF7357 (Black)

Rockbros face mask, for cycling LF7357 (black)

The Rockbros LF7357 face mask is perfect for winter or autumn. It will protect your face and mouth from the wind and shield you from the sun thanks to the special visor. It is extremely soft, warm and comfortable - for example when cycling, running or skiing. It is made of durable, breathable materials and, thanks to its clever design, can be worn comfortably under a helmet.

Effective protection against the cold

This practical face mask is ideal for cycling, winter tours, running and more. It will protect you from the cold, and its collar can be additionally sealed to provide better wind protection. What's more, the mask is made of a pleasant-to-touch fleece that is perfect for retaining heat. It has also been equipped with a windproof hood.

Comfortable to wear

The mask was created from a soft and breathable fabric, making it very comfortable. The elastic mesh on the mouth ensures you won't be stuffy, and the adjustable left and right sides allow you to adjust the size of the product to suit people with different head circumferences. You can also wear the face mask in different ways.

High quality workmanship

High-quality materials such as lycra and spandex have been used to make the accessory. This makes the face mask very durable and stretchy - don't worry about it being damaged. You can also wear it comfortably under your helmet. It's ideal for cycling, skiing or skating, and will also work well for shoveling snow and working outdoors.
