Bike sleeve, size L Rockbros XT057-1BKL (black)

Do you happen to ride your bike on summer sunny days? Give yourself better protection from the sun! The Rockbros XT057-1BKL cycling sleeve is made of breathable, stretchable ice silk, which guarantees a pleasant cooling feeling even in hot weather. At the same time, it is very comfortable and does not slip off the hand. It also provides excellent protection from the wind.

More comfort when riding

The sleeve is made of breathable ice silk, which wicks away perspiration perfectly and stays dry for a long time. This makes it ideal for use in hot weather. It has also been fitted with a special mesh. All this means that it can provide a pleasantly cool feeling in almost any situation. What's more, it will protect your hands from the sun and avoid sunburn.

Opt for the highest quality

The material used to create the sleeve is not only pleasant to the touch and breathable, it is also highly durable, stretchy and elastic. It also stands out for its high resistance to damage and wear. What's more, the product adheres perfectly to the body and, thanks to the extended non-slip elements, will not slip off the hand. All this makes the sleeve perfect for cycling, running and more.
