OneOdio Studio HiFi Headphones

Give yourself even better sound quality. The OneOdio Studio HiFi headphones offer high-end 50mm drivers so you can enjoy fantastic HiFi sound. They also guarantee unparalleled comfort and stand out for their wide compatibility. They also have a microphone integrated into the cable. What's more, Shareport technology allows you to connect 2 pairs of headphones together and listen to music together.

Amazing sound experience

Discover excellent HiFi sound quality. The headphones are equipped with 50-millimeter drivers, which means they can deliver exceptionally clear, natural sound and deep, powerful bass. Hear previously unknown details of your favorite songs and love them anew!

Exceptional comfort

Use the headphones for as long as you want - don't worry about discomfort. The Studio HiFi model offers soft and large earcups that fit snugly around your ears without exerting uncomfortable pressure. Say goodbye to pain and fatigue! Also noteworthy is the adjustable headband, thanks to which you can easily adjust the headphones to your needs. What's more, transporting the product is made easier by the included case.

They will prove themselves in any situation

The microphone, integrated into the cable, means that using the headphones you can freely talk on the phone, participate in online meetings or communicate with other players during an online game. There's also a small button that you can use to conveniently pause and resume playback, switch a song and handle incoming calls.

Shareport technology

Want to listen to music together with a loved one? Or maybe you plan to watch a movie with someone? Take advantage of Shareport technology! Simply connect 2 pairs of headphones together using the included 6.35mm to 3.5mm cable. When you do this, the same sound will be played in 2 devices!

Wide compatibility

Forget about limitations. Studio HiFi headphones are compatible with many popular devices - you can easily connect them to your smartphone, iPad, laptop, computer, game console or TV, for example. So you can comfortably listen to music, edit your next YouTube video, watch a movie or take care of a game.
