

Cycling Helmet with glasses Rockbros TT-16 (black)

Cycling Helmet with glasses Rockbros TT-16 (black)

Ref: 5905316146006

Rockbros TT-16 bicycle helmet

The Rockbros TT-16 bicycle helmet will allow you to take care of your safety during bike rides. It was created from skin-friendly materials and is lightweight, which translates into comfort. In addition, the helmet is adjustable and has detachable sun goggles.

Comfort of use

The Rockbros TT-16 bicycle helmet is equipped with a special knob, with which you adjust it so that you are comfortable. In addition, you can also adjust the clasp under your chin. The straps on the inside are made of breathable material and increase comfort while riding by effectively absorbing shocks.

Detachable goggles

You'll also find goggles with a magnetic fastener, which you can detach at any time if you don't need them. They have been tinted to protect your eyes from the sun's rays. In addition, they provide full protection against dirt getting into your eyes.

Thoughtful design

The helmet consists of 3 layers, for even greater safety. The outer PC plastic part is distinguished by its high hardness and resistance to wear and impact. Another layer of EPS foam cushions falls, and the inner layer increases comfort during use. In addition, the helmet is

suitable for head circumference ranging from 58 to 65 cm.

Wear as you are comfortable

You can wear the Rockbros TT-16 in several ways. If you are going for a long ride, attach goggles. If you temporarily don't use them, you can detach them completely from the helmet or attach them in reverse. Meanwhile, the extra shield reduces wind resistance while riding.
