Cycling Lock Rockbros 3230002001 (black)

Ref: 5905316146167

Rockbros bike lock 3230002001

A solid clasp is a must when you are moving a unicycle. Rockbros offers a product that stands out for its solid workmanship and interesting lock design. The clasp's cylinder is made of zinc alloy and additionally coated with a layer of hard, wear-resistant ABS, thus providing exceptional protection. The thick chain measures about 95 cm and will allow you to secure your bicycle, motorcycle and other unicycles.

Practical protection

The clasp has a specially designed lock that you can double secure. With the help of a key, you will open/close it in the traditional way. The product also offers the possibility to operate it with a code. Take advantage of both ways and be sure that your bike stays where you parked it.
