

Photochromic cycling glasses Rockbros 10142 (white)

Ref: 5905316146280

Photochromic cycling glasses Rockbros 10142 (white)

ROCKBROS photochromic cycling glasses 10142 (white)

Cycling, running, or maybe beach volleyball? Whatever activity you choose, it's a good idea to provide your eyes with comfortable sun protection. Rockbros 10142 sunglasses are a great solution for athletes and non-athletes alike. The photochromic lenses darken and lighten, depending on the lighting and ambient temperature. The use of high UV protection effectively protects your eyes from harmful UVA and UVB rays, while the well-thought-out design ensures high comfort and guarantees that you can use them together with the corrective glass frames you'll find in the set. The glasses are distinguished by high durability and resistance to bending, and are equipped with detachable temples, which you can replace with a comfortable sports band.

Photochromic lenses

You can easily improve your comfort while cycling or playing sports with the Rockbros 10142. You no longer need to take off your glasses every time the sun goes down to see better - photochromic glasses change the degree of darkening, depending on ambient conditions such as temperature and lighting, so you can see clearly in all circumstances. The lenses are made of durable polycarbonate, so they are resistant to damage and will serve you for a long time.

Created with comfort in mind

Rockbros cycling goggles are distinguished by their well-thought-out design and will provide you with full comfort even during long hours

of use. You can replace the detachable, elastic temples with a comfortable sports band that will keep the glasses in place while running. The upper part of the frames features a sweat shield and takes care of the adjustability of the nose pads. What's more, the glasses are extremely lightweight and feature a protection level of 400 UV. All this makes Rockbros 10142 a reliable companion for your sporting exploits!
