Wireless vacuum cleaner with mop function Deerma DEM-VX96W

Wireless Upright Vacuum with Mopping Function Deerma DEM-VX96W

DEM-VX96W is a vertical wireless vacuum equipped with two brushes that simultaneously wash and scrub the floor, saving you plenty of time and effort. Thanks to the vacuum's ability to automatically recognize the type of dirt, it doesn't matter whether it is solid, like cereal flakes, or liquid like milk - the Deerma vacuum can handle both. A 15kPa suction motor ensures that all dirt is removed and the floor becomes clean and sterile thanks to electrolytic water sterilization. The brushes are continuously cleaned inside the vacuum along with the floor, and dirty water is immediately transferred to a separate tank, which self-cleans once the vacuum is connected to the base and a button is pressed. A high-resolution LED display and voice messages make using the device intuitive even for older people. But that's not all the advantages!

Convenience and Flexible Operation

You no longer need to divide cleaning between vacuuming and then mopping - Deerma DEM-VX96W performs both of these tasks simultaneously, and you can enjoy clean floors in less time. Thanks to its wireless design, moving the device around the house is free and comfortable.

Sterilization and Comfort of Cleaning

Deerma DEM-VX96W guarantees not only cleanliness but also sterility of surfaces. Thanks to electrolytic water sterilization, the floor

becomes free from bacteria and germs. Additionally, the brushes inside the vacuum are cleaned on the go along with the floor. Dirty water immediately goes into a separate tank, which self-cleans after placing the vacuum in the base. Thanks to its construction, the vacuum also cleans corners and breaks - with a 6mm margin. The device also has combs that brush the vacuum roll to clear it of hair and other debris. Both brushes are cleaned, rotating back and forth, to get rid of dirt hidden between fibers. Clean brushes, clean floor.

Working and Charging Time

An ergonomic design and labor-saving construction make cleaning easier than ever before. The battery allows for 30 minutes of continuous work, which is enough to clean an area of 120m². The charging time for the 4000mAh battery is 4 hours.

Intuitive Operation and Voice Messages

Even if you are an older person or simply appreciate ease of use, the Deerma vacuum will meet your expectations. It is equipped with a high-resolution LED display, which informs about the operating status, battery condition, tank filling, and much more. Additionally, voice messages make using the device even easier.

Unique Brush System and Easy Maintenance

The Deerma DEM-VX96W vacuum features double brushes without a casing, so there is no risk of residue collecting in bends. What's more, the brushes are easy to remove - just press a button to open the frame, and they will pop out automatically. This makes cleaning and replacing the brushes quick and hygienic.

Included in the set:

Vacuum x 1
Handle x 1
Base x 1
Cleaning brush x 1
Adapter x 1
Manual x 1
Brand Deerma
Model DEM-VX96W
