Wireless Air Conduction Headphones Joyroom JR-X2 (black)

Air Conduction Joyroom JR-X2 wireless headphones (black)

Do you lead an active lifestyle? Do you want to listen to music freely yet safely during your workouts? Opt for the Joyroom JR-X2! These unique bone headphones offer high sound quality and stand out with a runtime of up to 8 hours. In addition, Bluetooth 5.1 guarantees a reliable wireless connection, and the built-in button provides convenient access to the most important functions.

Bone conductive headphones

The ankle-guided headphones are perfect for jogging, for example. They allow you to listen to music while not clogging your ears, which means you are aware of what is going on around you at all times. This allows you to take better care of your safety - you'll be able to hear an oncoming car or bicycle bell right away!

Bluetooth 5.1

Say goodbye to latency and other signal problems. The JR-X2 headphones use Bluetooth 5.1 technology, so they can provide fast, stable and reliable wireless transmission with a range of up to 12 meters. What's more, the product connects very quickly to selected devices - forget about complicated, time-consuming setup!

Working time of up to 8 hours

Are you planning a longer jog? Or are you going on a day-long bicycle trip? Don't worry that the headphones will drain too quickly and prevent you from listening to your favorite songs! The working time of the JR-X2 reaches 8 hours or 48 hours in standby mode. It only takes about 1.5 hours to charge the device.

Comfort of use

The JR-X2 bone headphones are extremely lightweight and comfortable. They won't pinch you - forget about ear pain! So you can listen to music for as long as you want without worrying about discomfort. What's more, the headphones stably stay in place - they won't fall off even during an extremely intense workout.

High quality sound

Let your favorite songs make your next workout more enjoyable. The JR-X2 headphones deliver clear, natural sound and a surprising richness of detail. Plus, they intelligently filter out outside noises for even better sound quality during phone calls.

Easy to use

With Joyroom, everything you could possibly need is at your fingertips. The JR-X2 headphones are equipped with a convenient-to-use button that not only starts playback, but also answers or rejects an incoming call, hangs up or switches a song. You don't even have to reach for your phone!
