

Blackhead Remover inFace MS7000 (pink)

Blackhead Remover inFace MS7000 (pink)

Ref: 6971308400059

Vacuum cleaner for blackheads and whiteheads InFace MS7000 (pink).

The InFace MS7000 mustache and blackhead vacuum is a device for cleansing pores with a modern method of fighting blackheads. It allows you to get rid of minor imperfections and deeply cleanse your face while not causing irritation. It offers 2 modes of operation and 3 levels of suction, so you can adjust its operation to your needs. It also comes with 4 handpieces that you can easily install.

2 modes of operation, 3 levels of suction

The device has 2 modes of operation: Continuous stands out for its high suction power and will be perfect for men, and Suction-release, which will be suitable for sensitive skin and women. What's more, you can choose between 3 levels of suction. The lowest is for dry skin, medium for combination skin, and the highest for oily skin.

4 tips included

The kit comes with 4 tips that you can use depending on the area and skin type. The large, round tip is for the T-zone, while the smaller one is for sensitive areas. On the other hand, you will use the oval head for everyday use, and the last one will work well for acne-prone skin. What's more, changing the tips is quick and easy, so you won't have any problems.

Thoughtful design

The inFace mustache vacuum is designed to make its use comfortable. The ergonomic design is responsible for the comfort of use, and the 30° curved head increases the efficiency of the device. What's more, the product was created from skin-safe materials and is resistant to damage. In addition, handling the device will not cause you any problems, and the compact design means that the MS7000 will not take up much space.
