

Audio Adapter 3.5mm Joyroom S-Y104 (white)

Ref: 6956116718978

Audio Adapter 3.5mm Joyroom S-Y104 (white)

Joyroom 3.5mm Audio Adapter S-Y104 (white)

You no longer have to choose between charging your iPhone and listening to music. The Joyroom adapter will expand the Lightning jack and allow you to connect two Lightning connectors to your device instead of one! The product features a robust design, is compatible with Apple devices and supports fast charging. The built-in dual chip ensures stable transmission, so you can forget about annoying crackling and interference. The minimalist design makes the product look very aesthetically pleasing and will fit into any pocket.

More possibilities with Joyroom

The adapter allows you to simultaneously connect your phone to the charger and, for example, headphones. This allows you to freely listen to music while charging your iPhone. The product is compatible with iOS software and does not interfere with headphones. So you can freely make phone calls or use the voice assistant.

Smart solutions

For the sake of your phone, we took care of the highest quality solutions, applied to the adapter. The dual smart chip enables interference-free operation and allows your device to charge stably, so you don't have to worry about the safety of your iPhone. What's more, the adapter cable is distinguished by its high conductivity and provides fast charging with 1.5 A.

Full iOS compatibility

The Joyroom adapter is fully compatible with iOS and supports charging and all headphone functions without any interference. You're free to listen to music, play games, or talk on your phone while you're topping up its power. Forget about pop-ups stating incompatibility - Joyroom won't let you down!
