Nicefeel FC5120 water flosser (green)

Want to take even better care of your teeth? With the Nicefeel FC5120 water flosser, you can effectively get rid of debris even from hard-to-reach areas of the mouth. The device allows you to choose from 4 operating modes and provides a pressure level of 20-115psi. It also boasts IPX7 water resistance and a sealed yet lightweight design. The irrigator's water tank has a capacity of 200ml.

4 selectable modes - say goodbye to impurities

The water flosser also allows you to thoroughly clean those areas of the mouth that a normal toothbrush cannot reach. It offers 4 modes to choose from, so you can tailor its operation to suit your needs. The Soft mode is suitable for beginners and those with sensitive teeth. Normal will be suitable for everyday use and Pulse will provide a gentle gum massage. There is also a DIY mode that will allow you to manually adjust the water pressure.

Specially designed water tank

The appliance is equipped with a 200ml water tank. This is enough to thoroughly clean your teeth without having to refill it! The water flosser is also very leak-proof - don't worry about it leaking. What's more, refilling the reservoir is extremely easy - just pour water in through the appropriate opening, which has been secured with a special plug.

Spare nozzle included

You will find 2 standard water flosser nozzles in the package - you can keep one for yourself as a spare or give it to a loved one so they can use it too. The product also stands out for its carefully thought-out design - it has been designed in such a way that you can conveniently store the tip inside. This way, you don't have to worry about losing it!

Cordless operation

The water flosser works wirelessly, so you can free yourself from unnecessary cables. The 1100mAh rechargeable battery provides a long runtime, and the included USB-C cable allows you to charge the device in just around 2.5 hours. The product also stands out for its lightweight, compact design. So you can easily take it with you on holiday or on a business trip!
