Orico USB 3.0. Hub with switches, 4x USB (black)

Ref: 6936761867580

Orico USB 3.0. Hub with switches, 5x USB (black)

Convenience and stability

Take care of the environment with the ORICO W9PH4-V1 and forget about repeatedly plugging your flash drive or device into your computer. The adapter is equipped with 4 individual switches, so you can reduce the load on your computer and increase the stability of your activities. The built-in USB 3.0 ports ensure the transfer speed and trouble-free operation. Read multiple memory cards or U-disks saving your precious time.

Security

The adapter is designed so that you can connect USB devices while preventing wear and tear on the original ports. The 4 vertically stacked ports allow you to connect several devices at the same time. The hub is made of materials that prevent overheating and short circuits. So you do not have to worry about data loss.

Fast work

Thanks to USB 3.0 ports, which transfer speed is up to 5 Gb/s, the HUB can read multiple memory cards or U-disks and synchronize files or data simultaneously on several drives, saving a lot of time. The technology used maintains a stable connection and switching between devices.

Small and portable

In the Orico W9PH4-V1 adapter, the design has been very carefully considered. Its small, compact size allows you to carry it anywhere. The parallel arrangement of the USB ports allows you to easily connect several devices at the same time.

Advanced technology

Stream 100 songs in 1s, 1 movie in 6s. The built-in VIA812 feature makes its broadband allocation and power management even better. You don't have to sacrifice high-speed data transmission and noise-free operation. With the W9PH4-V1 adapter, you are guaranteed a smooth operation.

Compatibility

ORICO W9PH4-V1 is compatible with Windows / Mac OS / Linux / Android 4.2 and other major systems; it also works with cell phones, tablets, hard drives, U drives, mice, keyboards, wireless adapters and other USB devices.
