Bluetooth 5.2 Transmitter / Receiver BlitzMax BT06, aptX

BlitzMax BT06 Bluetooth 5.2 Transmitter/Receiver, aptX

The BT06 transmitter/receiver features wide compatibility and provides stable transmission. It supports 2 modes of operation - TX and RX and can connect to two pairs of headphones simultaneously, and thanks to its 600 mAh battery, its operating time reaches up to 20 hours on a single charge. What's more, Bluetooth 5.2 guarantees stable transmission over a distance of up to 10 meters.

Reliable connection

The Bluetooth 5.2 chipset, with which the BT06 is equipped, is responsible for fast and stable transmission. The Blitzwolf transmitter/receiver also supports several transmission and reception protocols, such as A2DP, AVRCP, HSP and HFP. As a result, you will enjoy a lag-free signal. Now you can listen to your favorite songs in Hi-Fi quality, watch movies and play games without interruption.

2 modes of operation

BT06 will work perfectly both as a transmitter and receiver. TX mode allows you to transmit audio signals from devices that are not equipped with a Bluetooth transmitter, such as a radio or MP3 player to, for example, wireless Bluetooth headphones. In RX mode, on the other hand, you can, among other things, play songs from your phone on an additional amplifier. Expand the possibilities of your equipment with Blitzwolf!

Wide compatibility

Wondering if the BT06 will be compatible with your equipment? The product is equipped with a digital optical and AUX interface. In addition, it has an SPDIF audio cable, a 3.5mm AUX audio cable and an RCA audio cable. As a result, it can meet all your connection needs and will work perfectly with a variety of devices. The possibilities are truly many!

Additional perks

The BT06 supports dual pairing, so it can connect 2 wireless audio devices or receivers simultaneously. All you have to do is press one button. What's more, it can automatically connect to a previously paired device. In addition, an easy-to-read display shows important information, such as the BT06's operating mode. The product also has a built-in microphone, so you can answer an incoming call with the touch of a button.

Long operating time

The BT06 transmitter/receiver is equipped with a powerful 600 mAh battery. As a result, one charge is enough for the device to operate for up to 20 hours in RX mode or 12 hours in TX mode. You can conveniently check the battery charge level thanks to the LED lights.

Included:

Transmitter/Receiver x1

3.5mm audio cable x1

USB charging cable x1

Fiber optic cable x1

Cable adapter x1

User manual x1

Specification:

□Manufacturer

□BlitzWolf

□Model

□BT06

□Function

□Transmitter and receiver

□Bluetooth version

□5.2

□Bluetooth range

□up to 10 m

□Audio codecs

□AAC, SBC, aptX/AD/HD/LL

□Supported protocols

□RX: A2DP, AVRCP, HSP, HFP; TX: A2DP

□Battery capacity

□600 mAh

□Playback time

□20 h (RX), 12 h (TX)

□Charging time

□approximately 3 h

□Charging port

□USB-C

□Inputs/outputs

□SPDIF, 3.5mm stereo audio port

□Compatibility

□Phones and pads (Android / IOS) and other audio devices with audio input interface
