Hair removal IPL Ulike Air UI04 (light green)

Ref: 6971526221306

Hair removal IPL Ulike Air UI04 (light green)

Enjoy smooth skin for longer. The Ulike Air IPL Depilator will work well for areas such as legs, underarms, arms, bikini area or above the upper lip. The product also allows you to choose between 5 energy levels and 2 modes. What's more, it ensures safe use. In addition, it offers a cooling function to prevent burns. You'll also find accessories included for safe and convenient use of the Ulike Air.

5 energy levels

The Ulike Air IPL epilator offers 5 levels of energy adjustment, so it will work well for different skin types. Levels: 1, 2 and 3 will be suitable for light hair and novice users. On the other hand, modes 4 and 5 will work well for coarser hair.

2 working modes

Ulike Air offers 2 modes that you can use depending on the body part you are epilating. Continuous mode is suitable for larger areas, for example, arms or legs. Single mode, on the other hand, will get rid of unsightly hairs above the upper lip and on the fingers. Use the epilator 3 times a week for the first 1-2 weeks, and twice a week for the next 3-5 weeks. After 5 weeks, use the device every 2 or 4 weeks.

A few steps to smooth skin

Using the Ulike Air will not cause you any problems. First, remove hair from all the parts you want to treat with the epilator - to do this, use the supplied razor. Then connect the device to a power source and put on the protective goggles. Then turn on the device and set the mode and energy level. Apply the epilator to your skin and press the dedicated button. When the treatment is finished, hold the power button for 1.2s to turn it off.
