

Landing Gear Extensions PGYTECH (P-16A-036) for Mavic Air 2

Ref: 6970801336254

Landing Gear Extensions PGYTECH (P-16A-036) for Mavic Air 2 / Air 2s

Mavic Air 2 / Air 2s Landing Gear Extensions

The lifts enable a more stable and safe landing. They extend the drone's legs by 35mm. They are also very light, so they do not have a negative impact on the drone and are easy to mount.

Fast disassembly

The landing gear lifts are easy to assemble and disassemble with the clip-on installation. The anti-release clamp and soft TPU rubber prevent them from sliding off of the drone.

Lightweight and stable

The devices are made of aircraft aluminum, which makes them durable and lightweight, so they do not adversely affect the drone. The lifts are solid, resistant to wear and scratches, and thanks to their silicone construction they provide cushioning during take-off and landing.
