

Cable USB to Lightning XO NB156, 2.1A 1m (black)

Cable USB to Lightning XO NB156, 2.1A 1m (black)

Ref: 6920680871896

XO 2.1A USB to Lightning cable (black)

Ensure safe charging of your devices with the XO cable! The product is distinguished by its resistance to wear and tear, allows simultaneous charging and data transmission and provides a maximum current of 2.1A. It is made of flexible and durable PVC and equipped with a smart chip that allows you to replenish energy without generating high temperatures, so you can rest assured about your equipment.

Solid workmanship

The XO cable was created from high-grade PVC, making it extremely resistant to bending, pulling and other hazards. The material will not fade or oxidize, so the product will retain its unique color for longer. The ends of the cable have been reinforced, which has a positive effect on its service life.

Stable connection and safe charging

The cable transmits current with a maximum current of 2.1A, which means that it enables fast charging of devices and helps protect their batteries. The product is equipped with a smart chip that reduces the charging temperature, so you don't have to worry about your smartphone overheating.
