Mechanical gaming keyboard Motospeed BK67 Bluetooth (red)

Motospeed BK67 Wireless Mechanical Keyboard (Red)

Looking for a versatile keyboard for gaming and everyday work? The Motospeed BK67 is for you! The product is equipped with 67 keys and features red switches. It supports Bluetooth 5.0 technology and allows you to connect to several devices simultaneously. It stands out for its long operating time, is lightweight and portable, and the RGB backlighting gives it a gaming touch.

RGB colour backlighting

The Motospeed mechanical keyboard will be the perfect addition to your gaming workstation. The dynamic RGB backlighting gives it an interesting look, and as the keyboard offers up to 16.8 million colours and more than 10 different backlighting modes, you can easily customise it to your preferences and create a unique atmosphere.

Mechanical switches

The keyboard is equipped with Motospeed mechanical switches. The red switches respond to 60 g of pressure and have a 2 mm stroke - such operation does not generate a lot of noise, so the keyboard is perfect not only for games, but also for work or everyday Internet browsing.

Anti ghosting - effective performance

Now you can play the most dynamic games and press multiple keys simultaneously without worrying that your keyboard won't register the right combination. The product supports Anti-ghosting technology, so its response is correct and definitely faster for multiple dynamic clicks. With the BK67 keyboard, you'll break more records with ease!

Wide compatibility

The BK67 wireless keyboard can be easily switched between several devices. Simply connect it to the hardware of your choice using Bluetooth 5.0 to conveniently use all your devices simultaneously. The product works with Windows, iOS and Android systems, so it will successfully support computers, laptops, MacBooks or phones. If you prefer traditional solutions, you can connect the keyboard using a USB cable.

Long battery life

You can use the keyboard wirelessly without having to worry about it failing when you least expect it. The product is equipped with a 1,300 mAh rechargeable battery, so you can use it continuously for 10 hours with the RGB lighting on. In standby mode, the device will work for up to 480 hours! You can easily top up the power using the USB-C cable included in the kit - this will take you around 4-5 hours. You can quickly check the battery status using the ALT + Fn key combination.

Well thought-out design

The product is extremely lightweight and portable, and thanks to its wireless operation you will be able to use it wherever you need it. It is multilingual and offers self-programmable keys. What's more, its ergonomic shape means you'll be comfortable even if you spend hours using it.
