Earphones TWS 1MORE PistonBuds Pro, ANC (white)

1MORE PistonBuds Pro Headphones (white)

Experience how good your favorite tunes can sound with the 1MORE PistonBuds Pro. Enjoy superior sound quality thanks to 10-millimeter dynamic drivers, QuietMax active noise cancellation technology will help you cut through the noise. Their operating time reaches up to 30 hours with the case, and Bluetooth 5.2 is responsible for reliable connectivity. Built-in microphones with DNN algorithm facilitate phone calls. Also noteworthy is the ergonomic design of the headphones

Feel like you're at a concert

The headphones are equipped with 10-millimeter dynamic drivers, which guarantees fantastic sound quality. Rich details, powerful bass, crystal clear sound - this and much more awaits you with Piston Buds Pro. They also support the AAC codec, which makes the 1MORE headphones provide an even better music experience.

Stable and reliable signal transmission

Interference, lag and other connection problems are a thing of the past! Advanced Bluetooth 5.2 technology is responsible for a fast and stable connection of up to 10 meters. So you can move freely without worrying about the connection or music being disconnected. 1MORE hasn't forgotten about gamers either! PistonBuds offers a special Gaming mode that reduces lag while making you enjoy perfect

audio and video synchronization. Now you can easily beat your opponent and get another victory in your favorite game!

Just you and your music

PistonBuds Pro use QuietMax hybrid active noise cancellation technology, which effectively eliminates ambient noise up to 38 dB. This allows you to fully immerse yourself in your favorite songs and disconnect yourself from the world around you. Whether you're working, studying, exercising or traveling, the 1MORE PistonBuds Pro headphones help you focus on what you're doing.

Customize their performance to suit your needs

The 1MORE Music app lets you customize the headphones' performance for almost any situation. There are up to 12 EQ settings at your disposal - no matter what kind of music you listen to, you're sure to find a setting that meets your needs! There's also Transparency mode, which allows you to stay connected to the world without having to take off your headphones, and WNR mode, which automatically reduces wind noise.

Conveniently make phone calls

Now you can talk on the phone in a crowded shopping mall or on a bus without any trouble. The headphones feature high-quality microphones that reliably record your voice. The PistonBuds Pro also use an intelligent DNN algorithm that filters out ambient noise for crystal clear conversations even in noisy environments. The aerodynamic structure also mitigates wind noise, so your voice remains clear and crisp while running or biking.

Take them with you wherever you want

PistonBuds Pro's carefully considered design will provide you with unparalleled comfort. The headphones are distinguished by their IPX5 water resistance, so you can use them even while working out at the gym or hiking in rainy weather. The compact case will even fit easily into your pocket. What's more, it has been coated with a special coating that prevents fingerprints. Now you can take your headphones with you anywhere and enjoy your favorite music wherever you go!

Long working time

You no longer have to worry about the headphones discharging at an unexpected moment. The built-in battery allows you to play music for up to 7.5 hours on a single charge with ANC off, or up to 5 hours with ANC on. Want to extend that time? Take advantage of the case included in the kit and extend their runtime to 30 hours! What's more, they support fast charging, so you'll be able to enjoy your music for another hour after just 5 minutes of charging.

Included
headphones
case
replaceable rubber bands x4
