

## Outdoor Alarm Sirene WiFi NEO NAS-AB06W TUYA

Outdoor Alarm Sirene WiFi NEO NAS-AB06W TUYA

Ref: 6924715900780

Outdoor WiFi Alarm Siren NEO NAS-AB06W TUYA.

Want to increase the security of your home? An outdoor alarm siren can help you do just that! With the ability to choose the type of alarm, you will adjust its operation to your preferences. What's more, it exhibits IPX5 water resistance, so you can easily install it outdoors. With solar charging and a dedicated app, using the alarm will be even more convenient.

### Reliable protection

The outdoor alarm siren is an advanced security device that provides enhanced security thanks to its 2.4GHz Wi-Fi connection and Bluetooth 5.0 technology. The siren's quick response to an intrusion attempt makes it a reliable way to deter intruders. The siren produces a loud sound and intense light, reaching 95 dB at a distance of 1 meter and 90 dB at a distance of 3 meters. In addition, an anti-tamper alarm, which protects the device from tampering and damage, has been built into the rear of the housing, greatly enhancing security.

### Various types of alarm

The outdoor alarm siren offers a variety of alarm options to meet individual user needs. A voice alarm reliably warns of potential dangers. A light alarm, on the other hand, is another form of warning that emits light when an intrusion attempt is detected. The final type of alarm is the voice light alarm, which combines the advantages of the two previously described types of alarms by emitting both sound

and light in an emergency situation, increasing the chance of successfully deterring intruders.

#### Comfort of use

The outdoor alarm siren is designed with convenience and functionality in mind. Equipped with a rechargeable lithium battery and solar panel, it can be ready to work in as little as 6-8 hours, thanks to solar power. Thanks to the low-power chip, the siren features low power consumption, which translates into a long operating time - up to 365 days of continuous operation. IPX5-rated water resistance means that the device can be installed outdoors and used even on rainy days, without fear of damage. The simple assembly guarantees quick and easy installation, which further enhances the user experience.

#### Even more possibilities

The outdoor alarm siren offers a number of even more advanced features that increase the application possibilities and user comfort. A dedicated app allows you to easily manage and control the device from anywhere. The siren works in conjunction with Tuya smart devices, allowing you to create smart scenes and operate multiple scenarios. What's more, it can be used in many places, such as a garden, school, parking lot or workplace. Sharing the device with your family allows you to create a smart home together with your family members, and sending notifications to your smartphone or tablet guarantees immediate information about potential threats. These advanced features make the alarm siren even more useful and versatile.
