

Jumper Cable Lokithor EC8

Jumper Cable Lokithor EC8

Ref: 6928493308479

Lokithor EC8 starter cable

Lokithor brand starter cable is a high-quality product, designed for starting car engines. It is distinguished by its robust construction, convenient cable length, and high conductivity. It has an EC8 connector, to which a 1.25-inch plug is attached, making it compatible with most batteries. The product is an essential accessory for any driver.

Robust construction

The cable was created from high-quality materials and provides a stable connection between the battery and the engine. It features high resistance to mechanical damage, vibration and temperature, making it a great choice for anyone who values quality and safety.

Wide compatibility

The LO-CLAMP-Pro starter cable is equipped with an EC8 connector, which allows for easy and secure connection to the battery. This connector is designed to ensure optimal energy efficiency and minimal current loss. The cable length is 50 cm, providing enough flexibility and length to connect to the battery.

Comfortable use

The distance between terminals is a maximum of 82 cm, providing enough length to easily connect the starter cables to the battery

terminals, even for hard-to-reach areas. The large distance between terminals also makes the LO-CLAMP-Pro starter cable compatible with most cars and engines. Don't be caught off guard by a sudden malfunction and have your engine starting essentials with you!
