TWS Remax wireless headphones (white)

Enjoy high quality sound and rich detail with the Remax 10 Plus. The headphones deliver stereo sound, thanks to the 13mm drivers. They also connect to your compatible device via Bluetooth 5.1, ensuring a stable connection without interference. What's more, they are ergonomic and provide a long operating time. The touch panels, on the other hand, make them easy to use and the digital display will inform you of the battery level.

Clear LED display

Don't be afraid of suddenly discharged handsets. Remax 10 Plus are equipped with an easy-to-read display that will provide you with information about the status of the device. From it, you will read the charge level of each headphone and the charging case in real time.

Low latency

The Remax 10 Plus headphones will also appeal to gamers. They offer low latency, for even more immersion. They are also perfect for watching movies, providing even better audio and video synchronisation.

Fast pairing

The Remax 10 Plus use Bluetooth 5.1, providing a fast and stable connection of up to 10m. What's more, each headphone connects to a

compatible device independently - so you can use both or just one of them. What's more, they will connect to your device automatically when you take them out of the case.

Lightweight and comfortable

Listen to music, a podcast or an audiobook for as long as you like without feeling tired. Remax 10 Plus stand out with their ergonomic design, they do not cause uncomfortable pressure and fit snugly to your ears.
