

Filters Freewell All-Day for DJI Mavic 3 Classic (8-Pack)

Ref: 6972971860133

Filters Freewell All-Day for DJI Mavic 3 Classic (8-Pack)

Freewell All Day filter set of 8 filters for DJI Mavic 3 Classic

All Day Kit is a complete set of 8 filters designed for DJI Mavic 3 Classic. The kit includes ND4/PL, ND8/PL, ND16/PL, ND32/PL, ND64/PL, CPL, ND1000, ND2000 filters, so you can reduce the amount of light entering the lens, and achieve advanced effects such as reducing glare on water surfaces while increasing exposure time. Create breathtaking images and experiment with Freewell filters! You'll find a special filter storage case included.

CPL filter

This circular polarizing filter is designed to reduce reflected light from various surfaces while ensuring color neutrality. The lightweight CPL filter is coated with a special coating that ensures optimal image quality. Your photos can gain even more depth and will impress with their naturalness.

ND1000/ND2000 filters

ND (Neutral Density) optical filters allow you to reduce the amount of light reaching the sensor of your camera or camcorder, without changing the color or tone of the photo. These filters are very useful when we need to increase the exposure time or increase the depth of field, but still maintain the right exposure. Filters allow you to reduce the amount of light consecutively by 10/11 apertures. As a result, you will get a blur of moving elements - such as water or clouds.

ND/PL optical filters

In the set you will find 5 different ND/PL filters. This is a combination of ND (Neutral Density) filter and CPL (Circular Polarizing) filter. They combine the properties of both filters, so you can get fantastic effects. They are used to reduce the amount of light and allow you to increase the exposure time. You can get the effect of blurring water or clouds in your photographs. Moreover, ND/PL allow you to reduce glare from surfaces such as water, glass, etc. Using the filters will allow you to get clearer, more natural landscape photos. ND/PL filters are available in various degrees of light reduction and polarization, allowing you to match them to specific lighting conditions and the effect you want.

Solid workmanship

All filters were created with attention to every detail. They are ultra-lightweight and won't disturb the balance of the drone. What's more, thanks to a special coating, the filters are resistant to scratches, dust and grease and guarantee the best image quality. Keeping them clean is no problem at all.

Included

Filters

case

Manufacturer

Freewell

Model

FW-M3C-ALD

Compatibility

DJI Mavic 3 Classic

Filter type

ND4/PL, ND8/PL, ND16/PL, ND32/PL, ND64/PL, CPL, ND1000, ND2000

Optical coatings

Dustproof, scratch-resistant, oil-resistant

Price:

€ 126.00
