

Set of 4 filters ND Freewell Long-Exposure for DJI Mini 3 Pro

Ref: 6972971860409

Set of 4 filters ND Freewell Long-Exposure for DJI Mini 3 Pro / Mini 3

Freewell Long-Exposure ND Filter Set of 4 for DJI Mini 3 Pro / Mini 3

The Freewell ND filter set is ideal for those who want to get fantastic shots with a motion blur effect. The set includes 4 ND filters - ND128 filter, ND256 filter, ND512 filter and ND2000 filter to reduce the amount of light entering the lens, allowing for longer exposure times. A practical case is also included to store the filters safely and protect them from mechanical damage.

Stunning effects

High-density ND filters will produce the perfect motion blur effect. This will make sunsets and sunrises appear even more beautiful and make moving water look silky smooth! The ND128 filter, ND256 filter, ND512 filter and ND2000 filter are available to you.

High-quality workmanship

The filters are made from high-grade German optical glass, which is incredibly resistant to scratches, dust or oily stains. So you can be sure to keep them in great condition for a long time! You will have no problem fitting them. Nor do you have to worry about them interfering with your drone's operation! A case is also included to keep the filters safe and protect them from damage.
