

## Set of 4 filters Split ND Freewell for DJI Mavic 3

Ref: 6972971860621

Set of 4 filters Split ND Freewell for DJI Mavic 3

Set of 4 Split ND Freewell filters for DJI Mavic 3

Freewell's Split ND Filter Set of 4 is a must-have accessory for anyone looking to achieve balanced exposure and capture beautiful landscapes with the DJI Mavic 3 drone. The set includes four Split ND (Split Neutral Density) filters - a UV/ND8 filter, an ND2/ND16 filter, an ND4/ND32 filter and an ND8/ND64 filter to control the amount of light entering the lens and achieve the right exposure.

With different lighting conditions in mind

Looking for a way to get breathtaking footage in different lighting conditions? Freewell filters will help you do just that! The kit comes with 4 different ND filters that reduce the amount of light reaching the lens, allowing you to get the perfect exposure in any situation. At your disposal is a UV/ND8 filter, an ND2/ND16 filter, an ND4/ND32 filter and an ND8/ND64 filter - now you can easily adjust the filter value to suit the conditions. Whether you want to take photos in bright sunlight or achieve a blur effect, you will achieve stunning results with the Freewell!

High-quality workmanship

The filters are made from high-grade German optical glass, which is incredibly resistant to scratches, dust or oil stains. So you can be sure to keep them in great condition for a long time! You will have no problem fitting them. Nor do you have to worry about them interfering with your drone's operation! A case is also included to keep the filters safe and protect them from damage.
