

## Filters VND Freewell Mist for DJI Mavic 3 (2-Pack)

Ref: 6972971860652

Filters VND Freewell Mist for DJI Mavic 3 (2-Pack)

Freewell Mist set of two VND filters for DJI Mavic 3

Designed for the DJI Mavic 3 Classic drones, Freewell's True Color Variable ND 2-5 Stop and ND 6-9 Stop filters help reduce sharpness for a more cinematic effect to your photos. The VND filters provide exposure reduction from 2 to 9 stops, allowing you to use wider aperture settings for shallower depth of field or motion blur. Thanks to True Color technology, these filters render colors faithfully while resisting dust, scratches and greasy stains.

Protective coating

Made of the highest quality materials, the filters have a special protective coating that does not affect the color optics of the materials created. The filters are therefore resistant to dust and scratches, as well as fingerprints and the formation of greasy stains, so keeping them clean is no problem. At the same time, they provide the best image quality and allow you to maintain neutral image colors. Your photos will be stunning!

GimbalSafe technology

Freewell is committed to high quality workmanship and subjects its products to rigorous testing, so you can be sure that your drone will be safe. Each filter has an ultra-lightweight frame that won't weigh down your device or affect its balance.
