HAVIT H2002G 2.4G gaming headphones (black)

Increase the level of immersion during exciting gameplay with Havit. The Havit H2002G gaming headphones are equipped with large transducers that are responsible for excellent sound quality. Their maximum duration is up to 30 hours. The adjustable microphone will reliably register your every word, and the coloured backlighting gives them a gaming touch.

Immerse yourself in the world of gaming

Now you can easily hear your opponent's footsteps and anticipate their movements! The headphones are equipped with 50mm drivers that deliver fantastic sound quality. So you can enjoy clear and richly detailed sound. With Havit, you'll feel like you're in the centre of the action of your favourite game!

Ultra-low latency

Havit H2002G are perfect for dynamic gaming! The headphones guarantee an ultra-low latency of just 25 ms, which translates into perfect synchronisation of sound and image. Now you'll be able to react instantly to your rival's movement and claim another victory!

Stay in touch with others

Plan tactics before the next game and warn other members of your team of your opponent's attack - now nothing stands in your way!

The H2002G features an omni-directional microphone, allowing you to communicate freely with other players during online games. What's more, you can easily position it just the way you want it - all thanks to its flexible design.

A design that will delight any gamer

Havit's headphones have been designed to provide the maximum level of comfort even during hours of gaming! The large, soft earcups made of breathable and skin-friendly material fit snugly around your ears - no need to worry about discomfort or uncomfortable pain. The adjustable headband can be easily adjusted to suit your needs. The modern and stylish design of the headphones with dynamic RGB backlighting is sure to appeal to many gaming enthusiasts.

Wireless connection

Forget about everlasting tangled cables! The headphones are wireless for the freedom you dream of. Conveniently connect them to the device of your choice in the 2.4GHz band. The built-in 1200 mAh battery provides up to 30 hours of use. Prefer to use your headphones without worrying about a sudden discharge during a key moment in the game? Use the audio cable!
