

Wireless Gamepad iPega PG-9097

Wireless Gamepad iPega PG-9097

Ref: 6974363710521

iPega PG-9097 wireless controller / GamePad

With the iPega PG-9097 you can easily defeat your opponent. The controller is distinguished by a 6-axis gyroscope, thanks to which it detects even the smallest deviations of the controller with high efficiency and allows it to react without delay. What's more, it is equipped with 2 vibration motors, for even more immersion. It works with Nintendo Switch and PS3 consoles, as well as Android, and iOS systems. You'll also find a smartphone holder included.

Precision

No matter what game you're playing, the iPega PG-9097 will let you take the win. The wireless controller is equipped with full 360° joysticks, for even more freedom during gameplay. Now you can enjoy even more precision.

Immerse yourself in the gameplay

Send a barrage of shots at your rival! The GamePad offers a Turbo button that, combined with the function button, allows you to serially execute a selected move. You no longer need to press the button repeatedly. What's more, the built-in motors respond with gentle vibrations to events on the screen, for a better immersive experience.

Tailored to your needs

Play for long periods of time without feeling tired or uncomfortable. The controller's ergonomic design makes the device feel great in your hands, and the large, comfortable buttons make it easy to use the GamePad. What's more, the iPega PG-9097 offers LED indicators that will let you know the battery level.

Programmable buttons

The controller allows you to assign selected functions to the buttons, so you can further customize its operation. You can also adjust the vibration level in 2 levels or do away with the function altogether.
