

Battery Green Cell AS10D31 AS10D41 AS10D51 AS10D71 for Acer

Ref: 5902701410087

Battery Green Cell AS10D31 AS10D41 AS10D51 AS10D71 for Acer Aspire 5741 5741G 5742 5742G 5750 5750G E1-521 E1-531 E1-571

Green Cell Battery AS10D31 AS10D41 AS10D51 AS10D71 for Acer Aspire 5741 5741G 5742 5742G 5750 5750G E1-521 E1-531 E1-571
With a Green Cell battery, your laptop will get a new life. The use of the highest quality components and perfect fit, will restore the mobility of your laptop. You will easily install it in your device and you can be sure of full compatibility with the notebook's electronics and software. To achieve the highest possible performance and durability, the battery uses high-quality Green Cell lithium-ion cells, state-of-the-art control electronics, and a housing made of durable ABS plastic. The whole thing is precisely manufactured and thoroughly tested.

High-quality lithium-ion cells from Green Cell

Green Cell's Li-Ion cells are proven rechargeable batteries with high real capacity, high durability and no memory effect. They are the heart of the battery and provide long service life. Their use translates into high capacity - 4400mAh - this is 20% more than other batteries with unbranded, low-quality cells.

Long working time

Depending on the configuration of the laptop and the mode of operation, the battery can last from 1.5 to 4h. The cells last up to 1,000 charging cycles, which translates into 2-3 years of trouble-free operation. Their capacity decreases very slowly and after 300 charging cycles (about 1 year of operation) they still retain more than 80% capacity

Modern control electronics

Thanks to it, the battery communicates with the laptop providing information about the state of charge, remaining operating time, or time to full charge. Most models use electronics from the renowned Texas Instruments company also used in original batteries. This guarantees a 100% match with the computer's electronics and drivers - the battery communicates with the laptop exactly like the original battery. The battery also has advanced protection against over-discharge, over-charging and thermal protection giving you the assurance of proper and safe operation.

Precision craftsmanship

Top-quality materials and an accurately molded shape make the battery a perfect fit in the laptop case and easy to install, keeping its sensitive cells and electronics safe.

Replace the battery, not the entire hardware!

A new battery is a better and more economical alternative than changing your computer. You will not only save money, but also take care of the environment. Your favorite laptop will get a new life, and we will take care of the recycling. We collect used batteries in each of our stores and finance activities that promote and support the recovery and recycling of batteries.

Manufacturer
