

Battery Green Cell 34GKR 3RNFD PFXCR for Dell Latitude E7440

Ref: 5902719422690

Battery Green Cell 34GKR 3RNFD PFXCR for Dell Latitude E7440 E7450

Green Cell battery 34GKR 3RNFD PFXCR for Dell Latitude E7440 E7450

Give your laptop a new lease of life with the Green Cell battery. The use of the highest quality components and the perfect fit, will restore the mobility of your laptop. You can easily install it in your device and you can be sure of full compatibility with your notebook's electronics and software. In order to achieve the highest possible performance and durability, the battery uses high-quality Green Cell lithium-ion cells, state-of-the-art control electronics and a housing made of durable ABS plastic. The entire unit is precisely manufactured and thoroughly tested.

High-quality lithium-ion cells from Green Cell

Green Cell Li-Ion cells are proven rechargeable batteries with high, real capacity, high durability and no memory effect. They are the heart of the battery and ensure a long service life. Their use translates into a high capacity of 4500mAh - 20% more than other batteries with unbranded, low-quality cells.

Long runtime

Depending on the configuration of the laptop and the operating mode, the battery can last from 1.5 to 8h. The cells last for up to 1,000 charge cycles, which translates into 2-3 years of trouble-free operation. Their capacity decreases very slowly and after 300 charging cycles (approximately 1 year of operation) they still retain more than 80% of their capacity.

Modern control electronics

Thanks to it, the battery communicates with the laptop providing information about the state of charge, remaining operating time or time to full charge. Most models use electronics from the renowned Texas Instruments company also used in the original batteries. This ensures a 100% match with the electronics and drivers of the computer - the battery communicates with the laptop exactly like the original battery. The battery also features advanced protection against over-discharge, over-discharge and thermal protection to ensure proper and safe operation.

Precision craftsmanship

Top-quality materials and an accurately reproduced shape ensure that the battery fits perfectly into the laptop chassis and is easy to install, keeping its sensitive cells and electronics safe.

Replace the battery, not the entire hardware!

A new battery is a better and more economical alternative than changing your computer. Not only will you save money, but you will also take care of the environment. Your favourite laptop will get a new life and we will take care of the recycling. We collect used batteries in each of our shops and finance activities to promote and support the recovery and recycling of batteries.

Manufacturer

Green Cell

Model

DE93

Capacity

1500 mAh

Voltage

7.4V / 7.6V

Cell type

Li-Polymer

Cell manufacturer

Green Cell

Series

Polymer series

Operating time

1.5 to 8 hours

Deep discharge protection

Yes

Overcharge protection

Yes

Colour

Black
