

Green Cell Rechargeable Batteries Sticks 4x AA HR6 2000 mAh

Ref: 5903317225829

Green Cell Rechargeable Batteries Sticks 4x AA HR6 2000 mAh

Green Cell Batteries Rechargeable Sticks 4x AA HR6 2000 mAh

These are rechargeable batteries that we can use in the same way as disposable AA batteries. Unlike them, however, we can recharge them, thus reducing the cost of using many domestic devices powered by traditional batteries. They are characterised by a high, real capacity of 2000mAh, which provides a longer operating time compared to disposable batteries.

High durability and operational safety.

The use of modern materials and advanced production technology significantly increases the durability of the batteries. Green Cell batteries provide up to 3 years of trouble-free operation even under heavy load, moreover they retain 85% of their stored energy even after 12 months of storage. They can also withstand extreme temperatures from -20 to 60°C with high performance!

Ready for immediate use

Green Cell AA rechargeable batteries are supplied charged, allowing them to be used immediately out of the box. There is no need to charge them beforehand. This prevents battery degradation and loss of capacity. They are compatible with a wide range of devices, such as remote controls for TVs and audio devices, wireless mice and keyboards, cameras and flashes, Xbox pads, home medical devices such as blood pressure monitors, clocks, radios, thermostats, scales, torches and bicycle lights or toys.

Change the future of our planet by changing your batteries.

Every year, more than 40 billion disposable batteries are used worldwide, and when used, they often end up directly in the environment. Green Cell batteries guarantee up to 3 years of intensive use, which is the equivalent of using up many traditional AA batteries ! With Green Cell batteries, you can significantly reduce your waste and help protect the environment!

□Manufacturer

□Green Cell

□Model

□HR6

□Designations

□R6 / AA / MIGNON / BK-3MCCE

□Technology

□Nickel-metal hydride / Ni-MH battery

□Recommended charging current

□0.5A - 1A

□Capacity

□2000 mAh

□Voltage

□1.2V

□Dimensions

□14.5 x 50.5 mm

□Number of units in the set

□4
