

Spray Mop Deerma TB500

Spray Mop Deerma TB500

Ref: 6955578034107

Deerma TB500 - clean floors easily and effectively!

Effective floor cleaning, short drying times and comfort - these are the three features that the Deerma TB500 mop combines. By choosing this device, you will quickly see that cleaning can turn from an unpleasant chore into a real pleasure.

Drying floors in a flash

No more wet floors! The Deerma TB500 features a short drying time - so short that you no longer have to worry about the cleaning effect being instantly ruined by your child's footprints or your pet's paws. The floor dries in no time - even before anyone has had a chance to step on it!

Say goodbye to stains, mould and dirt!

Mop too dry or too wet to clean effectively? Streaks and mould are keeping you up at night? With the Deerma TB500, these problems are a thing of the past! The mop is equipped with a polymer pump that takes just 0.1 seconds to atomise. The device also precisely controls the leachate - it does not exceed 1.7-2.0 ml. This is all it takes for the floor to be thoroughly cleaned and dry in no time at all.

Sprayer with impressive reach!

By controlling the mop, you can achieve a spray reach of up to 95 cm. This ensures that the water is optimally released in the right

space, saving you time.

A lightweight mop for everyone

The Deerma TB500 weighs surprisingly little - just 0.75 kg! To lift the mop, therefore, you need to exert the same amount of force as it takes to lift just three apples - which is really not much. As a result, anyone can use it without much effort.

Capacious water tank - large capacity for action

The Deerma TB500 will surprise you with its large water tank capacity - it is as large as 350 ml. By filling the tank completely, you can therefore thoroughly clean the floor of a flat of up to 100 m². Be amazed by the outstanding performance of the Deerma TB500 mop and enjoy perfectly clean floors!

The brush for everything

Made of carbon fibre, the brush can tackle even the toughest dirt. It is not afraid of dust, spilled drinks, small debris or pet hair. It also absorbs water perfectly and is extremely durable. With its help, you can get rid of dirt quickly and effectively.

Triple construction - perfect performance

The brush owes its effectiveness to its triple-layered construction. The cleaning layer is perfectly attached to the mop. Underneath it is a layer that absorbs water and maintains the right level of moisture on the brush. The last layer is responsible for absorbing dust and dirt and also reduces friction. Thanks to this complex structure, you can always count on excellent performance from your Deerma TB500 mop.

Comfortably clean any space

The Deerma TB500 mop brush is only 3 cm thick and you can rotate it 360° while cleaning! This makes it easy to clean every corner and get into hard-to-reach places, such as under beds or between chair legs. No dirt is hidden from you - with the Deerma TB500 you can get to it and get rid of it in no time. You can also reach high places with no problem - the long pole of 120 cm and the low weight of the machine make cleaning problem areas a thing of the past.

Boost the performance of the Deerma TB500

To further enhance the mop's effectiveness, add a suitable detergent to the water tank. This enhanced action of the Deerma TB500 will allow you to get rid of dust, food spills or mud stains without too much trouble.

Simplified cleaning of the appliance

If necessary, you can also remove the mop cover very quickly. This function is useful, for example, when you want to clean the appliance. Even frequent removal and re-installation of the cover will not damage it or cause problems with it falling off - the Deerma TB500 can withstand almost anything and will serve you for a long time.

Timeless design

The Deerma TB500 attracts attention with its interesting and ergonomic design. The mop handle is comfortable and allows for easy manoeuvring. The equipment is in a muted, light colour scheme, impressing with its classic elegance and making both a practical and aesthetically pleasing addition to any interior.
