

Cable USB Lightning Green Cell GC Ray, 120cm, for iPhone, iP

Ref: 5903317227748

Cable USB Lightning Green Cell GC Ray, 120cm, for iPhone, iPad, iPod, white LED, quick charging

Green Cell GC Ray USB/Lightning cable

The 120 cm long GC Ray USB-A/Lightning cable allows instant charging and data transfer. It is distinguished by its white backlighting and support for Apple's 2.4A fast charging technology. The product is made of durable materials, which translates into high durability.

Fast power and data transfer

Thanks to Apple's 2.4A fast charging technology, the Green Cell cable will renew your smartphone's energy surprisingly quickly. What's more, it enables data transfer speeds of 480 Mbps. You no longer have to wait long for your files to be transferred to your chosen device.

Modern design

What sets the GC Ray cable apart is the subtle white illumination of the Lightning plug. Thanks to it, you can easily locate your phone, even in unfavourable lighting conditions. What's more, the length of the cable is up to 120 cm - so you can use your smartphone comfortably, even when it's plugged in to charge.

Wide compatibility

The GC Ray is compatible with Apple devices that are equipped with a Lightning port. Whether you're using the latest smartphones such as the iPhone 11, 12, 13 Pro Max, Pro, Max, Mini, XS Max, XS, S, SE, or iPads - the Green Cell cable will be a great choice!
