Cable USB Micro Remax Lesu Pro, 1m, 2.1A (black)

The Remax Lesu Pro is an extremely powerful and durable cable designed for charging mobile devices and transferring files. With a fast 2.1A charging rate and data transfer speeds of up to 480 Mbps, it will work well in almost any home. The robust construction of the cable prevents mechanical damage and extends its life.

Fast charging, fast data transmission

The Remax Lesu Pro offers up to 2.1 A, which means that it allows you to charge your chosen devices in just a few moments. This gives the user more time to use the device and less time to charge it! In addition, the cable allows you to transfer files at speeds of up to 480 Mbps. If you frequently transfer photos or videos, you will certainly appreciate this solution!

Robustness and durability

The Remax Lesu Pro cable is also characterised by its robust construction, which provides resistance to mechanical damage. The PVC coating protects the product from abrasion and breakage, which significantly extends its life. An additional advantage of the cable is the durable copper cable.
