

## Ultrasonic humidifier Deerma LD220

Ultrasonic humidifier Deerma LD220

Ref: 6955578033681

### Deerma LD220

Deerma LD220 is the latest generation floor humidifier that will improve air quality by maintaining adequate humidity in the room. The included remote control will allow convenient operation of the device, and you can enjoy properly humidified air for many hours.

### Remote control

The humidifier is equipped with a special remote control that can control the device. Four buttons allow you to use all functions: on/off, time setting or steam function. In addition, the device has a magnetic plate to which you can attach the remote control to make it always easily accessible.

### Long and effective working hours

Thanks to the large capacity of the water container of up to 4 liters, the device can operate for many hours to properly moisten the room and the water refill is child's play.

### Not only humidified air

Wide 52 mm wide outlet opening allows to throw steam up to 540 mm high, which accelerates the operation of the device, and the system of breaking water molecules allows to moisten not only the air, but also the skin.

#### Two functional modes

Two humidification systems allow you to set the humidity level manually or automatically, which adjusts the mode to the current room air condition.

#### Permanent humidification system

Depending on the need, the continuous humidification system will set the steam output from 45% to 90% to avoid too high or low humidity. The unit can operate for up to 12 hours in automatic mode, and then switches off by itself.

#### Slim design

The modern cone-like look of the humidifier will fit into any room. It can be placed on the floor, but also on the desk or chest of drawers.

#### Quiet work

LD220 humidifier is extremely quiet. The sound level of 35 dB makes it almost inaudible even at night.
