Remax RM-850 Gaming Headphones (black)

RM-850 are gaming headphones that will give you a phenomenal experience during any game. They are distinguished by spatial, richly detailed sound and an extremely lightweight, ergonomic design, so that using the headphones for hours does not cause discomfort. This model is also equipped with an omnidirectional microphone and enhanced with colorful RGB backlighting, which further gives the headphones a gaming feel. What's more, the dual connector (USB + 3.5mm mini jack) guarantees wide compatibility.

Fantastic surround sound

The headphones provide surround sound, rich in detail. They use 50 millimeter drivers and have a frequency response of 20 Hz-20 kHz. This means they process the full range of sounds audible to the human ear and provide solid bass, as well as clear mids and highs. With Remax, you will clearly hear the footsteps of your approaching opponent and surprise them first!

Wide compatibility

The RM-850 is equipped with dual connectors - USB and 3.5mm mini jack, which means you can connect them to the equipment of your choice without any problems. What's more, with an impedance of 32 ohm, the headphones will work great with most audio devices, such as smartphones, MP3 players and computers.

Multidirectional microphone

The headphones feature an omni-directional microphone that perfectly collects sound in a 360° range, while effectively reducing noise. You can freely communicate with other players and determine the best tactics without any interference! In addition, you will find a convenient remote control on the cable, which will allow you to manage the volume, as well as turn the microphone on or off.

Comfortable and lightweight

Remax RM-850 were created with comfort in mind, so they are extremely lightweight, and their earcups are made of body-friendly eco leather. What's more, the thermoelastic foam used inside them makes the earcups mold to the shape of your ears, making the headphones even more comfortable. Play and listen to music all day long without discomfort! The advantages don't end there! The headphones feature colorful RGB backlighting that will create an interesting atmosphere in your gaming space.
