

Magnetic car holder for grid Cygnett Magnetic Air Mount (BI

Ref: 0848116018133

Magnetic car holder for grid Cygnett Magnetic Air Mount (Black)

Cygnett Magnetic Vent Car Mount for Grille (black)

A car mount is an essential accessory for any driver. This magnetic one by Cygnett provides a quick and hassle-free way to mount your phone on the grille. It features a simple design and a solid magnet that will hold your smartphone in any conditions. In addition, it allows you to position it vertically or horizontally.

Simple installation

The easiest possible option - mounting on the ventilation grille. You just need to insert the clip of the holder into the ventilation grille to stably position it in a place that suits you. It requires no additional tools, and its removal is child's play. This is especially convenient when you change cars or want to lend the holder to someone else.

Exceptional strength of the magnet

Extremely strong magnetic rings attract your phone with tremendous force, so you don't have to worry about it falling or moving while driving. Your phone doesn't support the MagSafe function? That's no problem! In the kit you will find a special magnetic pad, which you just need to insert under the phone's case. Now your smartphone is compatible!

Adjust the position of your phone

The product takes up little space and offers 360° adjustability, so you can position your phone both vertically and horizontally. Are you using navigation? Or are you simply playing music? The Cygnett magnetic mount will adapt to your needs!
