Ref: 6953156301481

Eye Massager EMS ANLAN 08-AMYY31-02A

EMS eye massager ANLAN 08-AMYY31-02A

Did you know that it only takes 10 minutes a day to keep the skin around your eyes and lips firm? Anlan offers a device that will help you get rid of visible fatigue from your face and take comprehensive care of your skin. The device offers 2 modes that use blue/red light wave, EMS stimulation, iontophoresis, vibration and temperature action.

Operation Hydration

In mode one, a combination of vibration, iontophoresis, heat and red light wave penetrate deep into the epidermal surface for optimal hydration. Temperature at 40°C improves blood circulation, red light has a positive effect on skin tone and elasticity, and the iontophoresis function makes nutrients from a mask or cream penetrate the skin much deeper than with traditional skin care. In addition, vibration at 8,000 rpm deeply relaxes the muscles, leaving a feeling of relaxation.

EMS lifting

In the second mode, you will get a lifting effect. Gentle EMS electrical pulses stimulate facial muscles, improving their tone and, as a result, skin tone. A wave of blue light penetrates the surface of the epidermis, stimulating collagen production, making the skin smoother and pleasing to the touch. Heat, as in mode 1, stimulates blood circulation in selected areas, improving epidermal nutrition. You will adjust the action of the EMS mode at 3 levels.

Ergonomic shape

You'll love the Anlan massager for its thoughtful design! The angled design makes the device perfectly adhere not only to the easily accessible areas of the face, but also to the skin around the eyes and mouth. Such a solution will allow you to comfortably perform daily treatments and enjoy the freedom of use! What's more, the massager is lightweight and small, so you can successfully fit it in your handbag.

Powerful and practical

The device uses a 400 mAh rechargeable battery that provides up to 80 minutes of wireless operation on a single charge, so the massager is sure to serve you on more than one trip! You'll find a cable included to help you top up the massager's energy. To increase the level of safety, the product is equipped with a smart timer, so it automatically shuts off after 5 minutes. Take a moment for your skin and enjoy its great condition longer!
